Subject: Certification that Fresenius Environmental Bulletin (FEB) is the official Journal of the Mediterranean Scientific Association for Environmental Protection International (MESAEP)

Dear Prof. Parlal, dear Harun

With this letter I would like to certify that Fresenius Environmental Bulletin (FEB) is the official Journal of the Mediterranean Scientific Association for Environmental Protection (MESAEP).

MESAEP is the oldest Scientific non-profit association working on Environmental Protection in the Mediterranean basin organizing since the late '70s bi-annual symposia dedicated to scientists working in the area of environmental protection. Each MESAEP symposium brings together a network of around 300 scientists for the most part from all Mediterranean countries and covers all scientific disciplines pertaining to environmental problems in the region. For over 40 years, selected articles from the MESAEP bi-annual conference proceedings, are also presented as full papers in the respective MESAEP special issues in FEB.

With kind regards,

A handwritten signature in black ink, appearing to read 'D. Sarigiannis', with a stylized flourish at the end.

Prof. Dimosthenis A. Sarigiannis
MESAEP President
